

To our members of CBH Cooperative

October 2017

The board of directors of the CBH Cooperative and Farmers Cooperative Association (FCA) of Gillette, WY want to inform their members that they have met jointly to discuss the advantages of partnering together through unification.

With today's agricultural business climate that has changed dramatically, it is essential that our cooperatives grow in size and scale to effectively serve our members with the products, services, and risk management tools that today's producer/rancher demands.

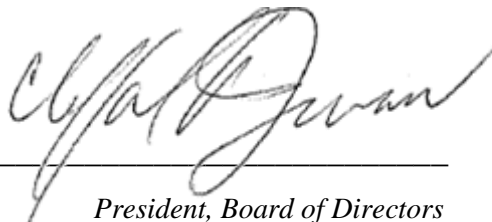

As we have visited with the FCA board, we have discovered that our two local cooperatives share the same values and culture, and desire to seek ways in which to better serve their members. We have also discovered that many efficiencies could be gained by working together.

It is the recommendation of the CBH Cooperative board to further pursue the due diligence process of unification. Further information regarding the unification process will be made known to the membership as it becomes available.

If you have further questions or comments, please feel free to visit with the board of directors and or general manager.

Thank you for your consideration and support of your cooperative!
